**ST. ALOYSIUS' COLLEGE
(AUTONOMOUS),**

Reaccredited 'A+' Grade by NAAC (CGPA:3.68/4.00)
College with Potential for Excellence by UGC
DST-FIST Supported & Star College Scheme by DBT
Jabalpur (M.P.)

About the College

St. Aloysius' College is a Premier Autonomous Educational Institute in Madhya Pradesh. The college has been Re- accredited 'A+' (3.68/4.00) by NAAC in the III cycle. It has carved a niche for itself by being the only college in the state, to have been awarded the highest CGPA in all three cycles of NAAC accreditation and is also awarded with College with Potential for Excellence, DST-FIST Supported and Star College Scheme by DBT. St. Aloysius' College is synonymous with quality and has a legacy of efficiency. With its best infrastructure and rich academic ambience the college holds glories of success in providing excellence in education and character building of the students proving its motto "Virtus in Arduo".

About the Seminar

Nations all across the world have concentrated their efforts on major goals such as pollution control, environmental conservation, resolving climatic disasters, and biodiversity conservation for attaining a sustainable environment. This involves arriving at decisions and taking actions to safeguard the natural world, with a special emphasis on preserving the environment's ability to support human life. To create a sustainable environment, a global collaborative effort is required, with each individual playing an important role. This seminar will focus on the collaborative efforts required for creating a pathway for the attainment of the vision of "Viksit Bharat @ 2024" by creating an awareness for attaining a conducive environment and capability for adaptation and mitigation, stimulating research-development, implementation of new technologies, climate finance mobilization, natural system restoration, and undertaking shared but distinct responsibilities for the betterment of the environment. It will further provide a road map for technical, eco-friendly and green solutions, financial mechanisms, and effective policies, all of which are crucial in solving the most serious issue in the present scenario. This seminar will be a step towards enabling the stakeholders to proactively address environmental issues and to take positive steps toward building a more resilient, livable, and sustainable future.

Objectives of the Seminar

- Increasing knowledge of particular aspects of weather and climatic extremes.
- Creating awareness and developing concern towards environmental challenges faced at the global level.
- Assessing climate change challenges and identifying the opportunities to cater to them.
- Investigating strategies for efficient environmental planning and sustainable resource management.
- Encouraging the stakeholders to take up a reasonable attitude and accountability for protecting biodiversity.
- Understanding the position of developed and developing nations concerning the blue-green economy.
- Focusing on practical implementation, monitoring, and auditing to deal with real-world issues.
- Creating an atmosphere to discuss and develop capabilities for evaluating the transformation of business models and the approaches undertaken for the use of resources within the circular economy.
- Emphasizing minimization, recovery, and treatment of waste rather than disposal of waste.
- Providing a platform to discuss the critical skills required to resolve the issues for the protection of the environment.

Call for Papers

Original papers on the following suggested themes are invited.
