

Report on Industrial Visit to Balaji Edibles Pvt. Ltd and Udaipur Beverages Ltd.

The Department of Economics, St. Aloysius College (Autonomous), Jabalpur, organised an industrial visit to **M/s Balaji Edibles Pvt. Ltd and Udaipur Beverages Ltd., located in the Richhai Industrial Area, Jabalpur**, on 3 October 2026. A total of 61 students participated in the visit, gaining valuable practical exposure to industrial operations and business management.

The primary objective of the visit was to bridge the gap between theoretical knowledge and practical application by familiarising students with the functioning of manufacturing industries. The visit provided students with an opportunity to observe production processes and understand the various operational and managerial activities involved in running an industrial enterprise.

At Balaji Edibles, students gained insights into the manufacturing processes and the functioning of a food-processing unit. The visit to Udaipur Beverages Ltd. further enabled them to understand the operations of the beverage industry and the coordination required to ensure efficient production and distribution.

An important highlight of the visit was the interaction with industry professionals, including the Production Manager, HR Manager, Supply Chain Manager, and Logistics Manager. These interactions helped students understand the roles and responsibilities of different departments, the importance of human resource management, and the significance of supply chain coordination and logistics in industrial operations.

The industrial visit proved to be an enriching learning experience, allowing students to connect classroom concepts with real-world industrial practices. It also enhanced their understanding of industrial organisation, production management, and the practical challenges faced by businesses.

The initiative reflects the Department of Economics' commitment to experiential learning and industry-oriented education, equipping students with practical knowledge and a broader understanding of the industrial
