CC 4. Language across the curriculum Part – I

Objectives

- Aim of the Course Language is the medium for comprehending ideas, for reflection and thinking, as well as for expression and communication.
- Enhancing one's facility in the language of instruction is thus a vital need of student- teachers, irrespective of the subject areas that they are going to teach.
- This course is visualized as a range of primarily text-based language activities, which will aid in strengthening the ability to 'read', 'think', 'discuss and communicate' as well as to 'write' in the language of instruction.
- It is likely that student teachers will begin the programme with different levels of language ability; hence group work that supports different levels of learning is envisaged as a central feature of this course.

Course outline

UNIT 1: ENGAGING WITH NARRATIVE AND DESCRIPTIVE ACCOUNTS

- The selected texts could include stories or chapters from fiction, dramatic incidents, vivid descriptive accounts, or even well-produced comic strip stories. Suggested Activities
- Reading for comprehending and visualizing the account (individual plus group reading and discussion/explanation)
- Re-telling the account in one's own words/from different points of view (taking turns in a smaller group)
- Narrating/describing a related account from one's life experience (in front of a smaller group)

13

 Discussion of characters and situations – sharing interpretations and points of view (in a smaller group)

aul

和 器和

Thompson Hand

Writing based on the text, e.g. summary of a scene, extrapolation of story, converting a situation into a dialogue, etc. (individual task).

UNIT 2: ENGAGING WITH POPULAR SUBJECT-BASED EXPOSITORY WRITING

· The selected texts could include articles, biographical writing, or extracts from popular non-fiction writing, with themes that are drawn from the subject areas of the student teachers (various sciences, mathematics, history, geography, literature/language pieces) For this Unit, the student-teachers should work in groups divided according to their subjects, within which different texts could be read by different pairs of student-teachers.

Suggested Activities

Reading to extract overall meaning, information, subject knowledge (guided reading in pairs and simple note making)

Identifying major concepts and ideas involved and making notes on these in some schematic form - flow diagram, tree diagram, mind map, etc. (guided working in pairs) Explaining the gist of the text/topic to others (in the larger subject group) Attending the writing style, subject-specific vocabulary and 'perspective' or 'reference frame' in which different topics are presented-this will vary across subjects and texts, and requires some interpretative skills for 'placing' the context of each text (group discussion and sharing)

Writing a review or a summary of the text, with comments and opinions (individual task)

UNIT 3: ENGAGING WITH JOURNALISTIC WRITING

The selected texts would include newspaper or magazine articles on topics of contemporary interest. Student-teachers can be grouped randomly for this Unit.

Suggested Activities

- Using reading strategies, such as scanning, skimming and reading for extracting information - as appropriate for initial reading of articles (guided individual task)
- Analysis of structure of the article, identifying sub-headings, key words, sequencing of ideas, use of concrete details, illustrations and/or statistical representations, etc. (guided working in pairs)
- Critical reading for attending 'framing' of the article, point(s) of view presented, possible biases or slants (small group discussion)

Researching and writing articles on topics of local interest (working to produce a local interest magazine).

EPC 1 READING AND REFLECTING ON TEXTS

OBJECTIVES

- To enable the students to read and response to a Varity of text in different ways To develop Meta cognitive awareness
- To enhance the capacities as readers and writers by becoming participants in the process of reading
- To enable the student teachers to work on the field and make predictions and check their predictions and then to summarize.

UNIT I Reading Skills

- Creating environment for reading reading clubs, class
- libraries Reading aloud and silent reading
- · Scaffolding: concept and activities
- Reading different texts types like stories, poems, riddles, jokes, and instructions for games

UNIT II Reading with comprehension

- · Reading for global and local comprehension
- Inferences, analysis and extrapolation
- · Reading strategies including word-attack strategies
- Discourse analysis
- Using reading as a tool for reference skills i.e. use of dictionary, encyclopaedia and internet
- Using ideas of critical literacy to analyse chapters from textbooks
- Acquisition of Reading Skills

UNIT III Types of text

- Narrative text
- Expository
- Autobiographical Narratives
- Field Notes
- Ethnographies
- · Addressing different types of skills and strategies

Mode of Transaction

- Participating in tasks and activities to improve proficiency in the receptive and productive skills of English.
- Text analysis of school textbooks to improve skills in critical literacy

Reflecting on one"s own learning to make connections with pedagogy.

Second Semester CC 1: Learning & Teaching

Aims of the Course

- To become aware of different contexts of learning and situate schools as a special environment for learning;
- · To reflect on their own implicit understanding of the nature and kinds of learning;
- Gain an understanding of different theoretical perspectives on learning with a focus on cognitive views of learning as well as social—constructivist theories;
- Explore the possibilities of an understanding of processes in human cognition and meaning-making them as basis for designing learning environments and experiences at school; and
- Appreciate the critical role of learner's based on differences and contexts in making meanings, and hence draw out implications for schools and teachers.

UNIT 1: THEORETICAL PERSPECTIVES ON LEARNING

Implicit knowledge and beliefs about learning (demystifying misconceptions).

 Perspectives on human learning: Behaviourist (conditioning paradigm in brief), cognitivist, information-processing view, humanist, social-constructivist (drawing selectively on the ideas of Skinner, Piaget, Rogers).

15/12

UNIT 2: ROLE OF LEARNER IN LEARNING

- Role of learner in various learning situations, as seen in different theoretical perspectives
- Role of teacher in teaching-learning situations: a) transmitter of knowledge, b) model, c) facilitator, d) negotiator, e) co-learner (The focus is on building understanding of different psychological perspectives of learning and helping student teachers to learn to apply them in different learning situations).
- Distinctions between learning as 'construction of knowledge' and learning as 'transmission and reception of knowledge'.

UNIT 3: LEARNING IN 'CONSTRUCTIVIST' PERSPECTIVE

- Social-constructivist perspective (also Bruner and Ausubel's perspective) and applications of Vygotky's ideas in teaching.
- Understanding processes that facilitate 'construction of knowledge':
 - (i) Experiential learning and reflection
 - (ii) Social mediation
 - (iii) Cognitive negotiability
 - (iv) Situated learning and cognitive apprenticeship
 - (v) Meta-cognition.
- Creating facilitative learning environments, teachers' attitudes, expectations —
 enhancing motivation, positive emotions, self-efficacy, collaborative and self
 regulated learning. (The focus is on learning as a constructive rather than a
 reproductive process. The learner- centered orientation has implications for
 understanding learning as contextual and self-regulated process and following
 suitable classroom practices).

UNIT 4: INDIVIDUAL DIFFERENCES AMONG LEARNERS

- Dimensions of differences in psychological attributes—cognitive abilities, interest, aptitude, creativity, personality, values.
- Understanding learners from multiple intelligences perspective with a focus on Gardner's theory of multiple intelligences. Implications for teaching-learning in the light of changing concept of intelligence, including emotional intelligence.
- Differences in learners based on predominant 'learning styles'.
- Differences in learners based on socio-cultural contexts: Impact of home languages of learners' and language of instruction, impact of differential 'cultural capital' of learners.
- Understanding differences based on a range of cognitive abilities— learning difficulties, slow learners and dyslexics, intellectual deficiency, intellectual giftedness. Implications for catering to individual variations in view of 'difference' rather than 'deficit' perspective. (The focus is on understanding the differential learning needs of the learners with regard to abilities, learning styles, language, socio-cultural differences/disadvantage, learning difficulties, and their implications for classroom practices and teaching).

Enit.2: Aims and Objectives of teaching Geography

- Aims/Values of teaching Geography
 - 2.1.1 Intellectual aims

- 2.1.2 Cultural aims
- Environmental aims
- Utilitarian aims
- 2.1.5 Aesthetic aims
- 2.2 Taxonomy and objectives of teaching Geography
 - 2.2.1 Knowledge
 - 2.2.2 Understanding
 - 2.2.3 Application
 - 2.2.4 Attitude and interest
 - 2.2.5 National Integration. International Understanding.
 - 2.3 Co-relation of Geography with History, Science, Mathematics and languages
 - 2.4 Trends in Geography Education
 - 2.5 Importance and Organization of Field trips, Visits
 - 2.6 Geography based hobby clubs / societies (National geography specials)

Unit 3: Instructional Design in Geography

- Meaning, importance and format of lesson plan 3.1
- 3.2 Principles of lesson planning
- 3.3 Characteristics of a lesson plan
- 3.4 Prepare Lesson Plan according to Active Learning Strategies
- 3.4 Unit plan
- Resource Unit 3.5

Unit 4: Methods of Teaching Geography

- 4.1 Meaning and importance of methods of teaching Geography
- 4.2 Different Methods of teaching Geography
 - 4.2.1 Lecture Method
 - 4.2.2 Laboratory Method
 - 4.2.3 Observation Method
 - 4.2.4 Excursion Method
 - 4.2.5 Project Method
 - 4.2.6 Discussion Method
 - 4.2.7 Active Learning Strategies

Practicum

- 1. Preparation of charts, globe and models of Geography.
- 2. Preparation of transparencies about-section of volcanoes, seabed, plains etc.
- 3. Interpretation of weather maps
- 4. Drawing of geographical maps
- 5. Preparation of resource unit in Geography

Assignments

1. Visit to an observatory, planetarium or Geography museum

- 2. Collection of specimens
- 3. Preparation of a project report based on local geographical survey.

Scheme of Assessment

-	Item	Marks
a.	Wirting a report 5 to 6 pages	5
b.	Collection and preservation of specimen's	5
	Total	10

- I. Submission of report after doing any one of the above practical work
- Each practical work carries 10 marks
 one internal test carries 10 marks

COMMERCE(E)

Objectives:

- To introduce student teachers with the methodology of teaching used in teaching of Commerce in schools.
- To make student teachers aware of the values of Commerce and the relationship of Commerce with other subjects.
- To encourage student teachers to use a wider range of teaching techniques in order to enable them to plan their lessons in teaching of commerce.
- To acquaint student teachers with the role of teaching aids, textbook, homework, libraries in commerce.
- To equip student teachers with the curriculum.

COURSE CONTENT:

UNIT-1

- 1. Meaning, nature, scope and concept of Commerce.
- 2. Place of commerce in secondary school curriculum and its critical appraisal.
- 3. Commerce and its relationship with other Social Sciences.

UNIT II

- 1. Different methods of teaching commerce, uses and critical analysis.
 - a. Lecture Method
 - b. Discussion Method
 - c. Problem-Solving Method
 - d. Project Method
 - e. Survey Method
 - f. Demonstration Method
- Commerce Text-books and Supplementary Materials.
 Techniques of teaching commerce subject: Questioning Answering, Assignment,

UNIT - III

- Analysis and Discussion on skills of teaching Commerce (practice for developing atleast 5 micro skills).
 - a. Skill of introducing the lesson
 - b. Skill of questioning
 - c. Skill of explanation
 - d. Skill of stimulus variation
 - e. Skill of black board writing

Unit 1: Meaning, Nature and Impact of Physics

Concept of science - Science as process and science as a product;

- Nature and Scope of Physics
- Impact of Science and Technology on modern living.
- Scientific Attitude Meaning definition and importance.
- Qualities of a person who possesses scientific attitude.
- Scientific Method-Meaning, importance and steps involved (with an illustration).

Unit 2: Aims and Objectives of Teaching Physics

- Aims of teaching Physics in Secondary school:
 - ..1 Personal development aim,
 - Learner's academic and process skills development aim, ..2
 - ...3 Disciplinary aim and
 - ..4 Cultural aim.
- Objectives of teaching physics:
- Bases for formulation of objective
- Objectives of teaching Physics at Secondary level: (To be Discussed keeping in view of the objectives of teaching Physics enunciated in the Physics syllabi of secondary school of M.P.); Instructional objectives of teaching Physics and stating them in observable behavioral changes:
 - i) Knowledge ii) Understanding,

iii) Application,

iv) Skill.

v) Attitude.

vi) Interest.

vii) Appreciation.

Unit 3: Approaches and Methods of Teaching Physics

Enquiry Approach -Meaning, Uses with Illustrations, Advantages and disadvantages.

Inductive Approach-Meaning, Uses with Illustrations, Advantages and disadvantages.

- Deductive Approach-Meaning, Uses with Illustrations, Advantages and disadvantages.
- Problem Solving Approach- Meaning, Uses with Illustrations, Steps, Advantages and disadvantages.
- Demonstration Method- Meaning, uses, Advantages and disadvantages.
- Lectures-Cum-Demonstration Method- Meaning, uses with Illustration, Advantages and disadvantages
- Laboratory Method- Meaning, uses with Illustration. Advantages and disadvantages.
- Guided Discovery Method Meaning, uses with Illustration, Advantages and disadvantages.
- Individual Instruction Techniques and Active Learning Strategies.
- Concept Mapping: Its use for summarizing a unit and evaluating students understanding

Unit 4: Instructional Design, Resources and Teaching Aid for teaching Physics:

- Lesson Planning-Meaning, Steps, Importance and Format of Lesson Plan according to active learning strategies.
- Unit Plan-Meaning, Steps, Importance and Format of Lesson Plan
- Resource Unit-Meaning, Steps, Importance and Format of Lesson Plan

CC 4. Language across the curriculum Part - II

Objectives

- Aim of the Course Language is the medium for comprehending ideas, for reflection and thinking, as well as for expression and communication.
- Enhancing one's facility in the language of instruction is thus a vital need of student- teachers, irrespective of the subject areas that they are going to teach.
- This course is visualized as a range of primarily text-based language activities, which will aid in strengthening the ability to 'read', 'think', 'discuss and communicate' as well as to 'write' in the language of instruction.
- It is likely that student teachers will begin the programme with different levels of language ability; hence group work that supports different levels of learning is envisaged as a central feature of this course.

UNIT 1: ENGAGING WITH SUBJECT-RELATED REFERENCE BOOKS

For this Unit, the student-teachers should work in groups divided according to their subjects. Within these groups, pairs of student-teachers would make a choice of a specific topic in their subject area which they could research from a set of available reference books. The focus of this Unit is, as much the learning of effective processes of reference research and its presentation, as the actual reading of the reference books themselves.

Sequence of Activities

Selecting the topic for research and articulating some guiding questions

 Searching and locating relevant reference books (could be from a school library or the institute library)

- Scanning, skimming and extracting relevant information from the books by making notes
- Collating notes and organising information under various subheadings
- · Planning a presentation with display and oral components
- Making presentations to whole subject group, fielding questions.

UNIT 2: ENGAGING WITH EDUCATIONAL WRITING

Selected texts could be drawn from the wide range of popular educational writing in the form of well-written essays, extracts or chapters from authors who deal with themes from education, schooling, teaching or learning. The writings selected should present a definite point of view or argument about some aspects of the above themes. Student-teachers can be grouped randomly for this Unit.

Suggested Activities

- Reading for discerning the theme(s) and argument of the essay (guided reading- individually or in pairs)
- Analysing the structure of the argument—identifying main ideas, understanding topic sentences of paragraphs, supporting ideas and examples, terms used as connectors and transitions (guided small group discussion)
- Discussion of the theme, sharing responses and point(s) of view (small group discussion)
- · Writing a response paper (individually or in pairs)
- Presentations of selected papers, questions and answers (large group)

EPC 2: DRAMA AND ART IN EDUCATION

Introduction

The need to integrate arts education in the formal schooling of our students is to retain our unique cultural identity in all its diversity and richness and encourage young students and creative minds to do the arts. An understanding of the arts will give our youth the ability to appreciate the richness and variety of artistic traditions as well as make them liberal, creative thinkers and good citizens of the Nation. Keeping in view some of these ideas, the National Curriculum Framework-2005, introduced arts education as a mainstream curricular area, which must be taught in every school as a compulsory subject (up to Class X) and facilities for the same may be provided in every school. Keeping this in view, it is all the more important that arts education is integrated in the school curriculum to provide an aesthetically viable atmosphere in schools encouraging creativity. For this, not only Art teachers but every teacher in the school system should

Naul HAIT

be sensitized to understand and experience the use of Arts for holistic development of the learner, as a teacher as well as an individual.

OBJECTIVES

- Understanding basics of different Art forms impact of Art forms on the human mind
- Enhance artistic and aesthetic sensibility among learners to enable them to respond to the beauty in different Art forms, through genuine exploration, experience and free expression
- •Enhance skills for integrating different Art forms across school curriculum at secondary level
- ·Enhance awareness of the rich cultural heritage, artists and artisans.

COURSE CONTENT

UNIT 1: VISUAL ARTS AND CRAFTS (PRACTICAL)

- •Experimentation with different materials of Visual Art, such as pastel, poster, pen and ink, rangoli materials, clay, etc.
- Exploration and experimentation with different methods of Visual Arts like Painting, block printing, collage, clay modelling, paper cutting and folding, etc.
- ·Paper framing and display of Art works.

UNIT 2: PERFORMING ARTS: DANCE, MUSIC, THEATRE AND PUPPETRY (PRACTICAL)

- •Listening/viewing and exploring Regional Art forms of music, dance, theatre and puppetry.
- Viewing/listening to live and recorded performances of Classical and Regional Art forms
- Participation and performance in any one of the Regional Arts forms keeping in mind the integrated approach
- •Planning a stage-setting for a performance/presentation by the student-teacher.

UNIT 3: APPRECIATION OF ARTS

Meaning and concepts of Arts and aesthetics and its significance at secondary level of school education

ger ye

By 104 07/04 07/7/17

- · What is the difference between Education in Arts and Arts in Education
- Identification of different performing Art forms and artists; dance, music and musical instrument, theatre, puppetry, etc. (based on a set of slides, selected for the purpose)
- •Knowledge of Indian Craft Traditions and its relevance in education (based on a set of slides, selected for the purpose)
- •Knowledge of Indian Contemporary Arts and Artists; Visual Arts (based on a set of slides, selected for the purpose)
- ·Indian festivals and its artistic significance.

Project Work (Units 1 and 2)

Theme-based projects from any one of the curricular areas covering its social, economic, cultural and scientific aspects integrating various Arts and Craft forms; Textbook analysis to find scope to integrate Art forms either in the text or activities or exercises; Documentation of the processes of any one Art or Craft form with the pedagogical basis such as weaving or printing of textiles, making of musical instruments, folk performances in the community, etc. – how the artist design their products, manage their resources, including raw materials, its marketing, problems they face, to make them aware of these aspects of historical, social, economic, scientific and environmental concerns. Student-teacher should prepare at least ten lesson plans in their respective streams of subjects (Science/Maths / Social Sciences/Languages etc.) while integrating different art forms.

Workshop

Two workshops of half a day each, of one week duration for working with artists/artisans to learn basics of Arts and Crafts and understand its pedagogical significance. The Arts forms learnt during the course should be relevant to the student-teachers in their profession. Activities, such as drawing, and painting, rangoli, clay modelling, pottery, mixed collage, woodcraft, toy making, theatre, puppetry, dance, music, etc. region specific should be given more importance for making arts learner-centred. The focus of the workshops should be on how art forms can be used as tool/method of teaching-learning of Languages, Social Sciences, Mathematics and Sciences.

PRACTICAL PART

BODY MOVEMENT- Different theatre games, Exercises, Martial Arts, Folk

Dances.

MEDITATION- Focus, Concentration.

. SCRIPT WRITING- characterization, dialogue, time and space, beginning,

middle, end.

- 4. POETRY RECITATION- Rigved Mantras, Vaachik Abhinay.
- 5. SELECTION OF PLAY FOR CHILDREN.
- CASTING.
- BUILDING OF A CHARACTER.
- 8. PARTS OF SPEECH- Volume, Pitch, Speed, clarity, Audibility, Diction,
 - Intonation, Feel and Toner Quality, Projection.
- 9. DESIGN OF A PRODUCTION.
- PRODUCTION- Poster Making, Audience, Execution of Different Aspects of Production, Analysis of Increase in Understanding of Children through Drama.

Suggested Approach for Teaching-learning Process

Every student-teacher must participate and practice different Art forms. They need to be encouraged to visit places of arts/see performances/ exhibitions/art and craft fairs/local craft bazaars, etc. Artists and artisans may be invited for demonstrations and interactions from the community. Student-teachers should be encouraged to maintain their diary on art interactions to enhance their knowledge and awareness in this area. Student-teachers can also be motivated to interpret art works/ commercials/events etc. to enhance their aesthetics sensibility.

A Resource Centre for Arts and Crafts should be a part of all the RIEs, where materials, including books, CDs, audio and video cassettes, films, software, props, art works of Regional and National level, books and journals must be displayed for the purpose of reference and continuous motivation.

Application of Arts and Aesthetics in day-to-day life, in the institute and in the community are some of the practical aspects, which needs to be taken care too. Student-teachers must organise and participate in the celebrations of festivals, functions, special days, etc.

Modes of Assessment

The complete course is of 50 marks. It is recommended that evaluation of this course should be done at both the levels; (i) Internal as well as (ii) External. Practical Activities (Units 1 and 2 of 30 marks) in nature are more on the process than the product, hence need continuous and comprehensive evaluation(CCE). Therefore, recommended to be evaluated by the internals. The theory and project part (Unit 3 and Project work of 20 marks) can be in viva-voce and in presentation mode therefore recommended to be evaluated by the externals. The engagement of student-teacher in the above set of experiences should be evaluated on continuous and comprehensive manner, based on (a) submission of work/project; (b) participation in the activities; (c) creative potential displayed; (d) application of aesthetic sensibility in campus events and in other course activities.

CC 1 Gender, School and Society

Course Objectives:

To enable the Student Teacher to:

- To acquaint the student teachers with the concept of gendered roles in society and their challenges.
- To develop an understanding of the inequality and disparities in equal opportunities in education in societal context.
- To enable the student teachers to critically examine the stereotypes and rethink their beliefs.
- To help student teachers to develop abilities to handle notion of gender and sexuality.
 Course Contents:

UNIT I Gender Issues: Key Concepts

- The meaning and concept of gender and experience of gender in across different social groups, regions and time-periods. Challenges in gendered roles in society: Family, caste, religion, culture, the media and popular culture (films, advertisements, songs etc.), law and the state.
- Unequal access of education to girls; access to schools; gender identity construction at home and in society.
- Indian societal context: Power and authority in Indian Social System (patriarchy).
 Socialization of child into a specific gender influences, and opportunities for education.

UNIT II Gender Challenges and Education

- Challenging gender inequalities or reinforcing gender parity: The role of schools, peers, teachers, curriculum and textbooks, etc. *
- Representation of gendered roles, relationships and ideas in textbooks and curricula,
- Schools nurture or challenge creation of young people as masculine and feminine selves.

UNIT III Gender Issues and Role of Teacher

- Counseling and Guidance: Teachers' need help to develop abilities to handle notions of gender and sexuality, (often addressing the issues under diverse cultural constraints, their own and their students', instead of shying away from the same.)
- 2. Sex Education: Perceptions of safety at school, home and beyond (The formulation of positive notions of sexuality among young people impact larger issues).
- Identification of sexual abuse/violence and its verbalisation, (combating the dominant societal outlook of objectification of the female body, and so on.)

UNIT IV Role of the Media and Life Skills Education

- Role of the media in propagation of popular beliefs, reinforcing gender roles in the popular culture and by implication, at school.
- Life Skills courses in school: provisions to deal with some issues of gender identity roles and performativity for the development of positive notions of body and self.
- Gender equality Education: of regions and exploring the roles of the institutions (family, caste, religion, culture, media and popular culture, law and the state).

Assignment:

1. Group Discussion:

B.Ed. students will observe and study the distribution of roles and responsibilities in schools and classrooms, rituals and school routines, processes of disciplining distinctly as for girls and boys, and in classroom interaction. Studying the everyday activities where the majority of girls constitute the assembly choir group and the boys form the inter-school cricket team; girls partnered to be seated with other girl students and boys with boys; sciences associated with boys and humanities with girls; art and craft considered to be the domain of the girls and physical education that of the boys; etc. Teachers need to question such stereotypes and help students rethink their beliefs. Why these issues are delineated only for supplementary extra-curricular periods in school and not integrated into subjects of study need to be discussed.

- 2. Group work& activities, brainstorming, audio-visual presentations: prospective teachers to attend and themselves undertake sessions of open verbalization with school students, voluntary cum friendly involvement in discussions, together with the co-participation of school (teachers, counselors and other resources), home (parents and siblings) and society (NGOs, other expert groups, etc.).
- Projects: Student-teachers will be exposed and trained to prepare pedagogic
 material and practice a pedagogy which can develop abilities and confidence in
 their students to critically evaluate and challenge gender inequalities, while being
 sensitive to social groups.

CC 2. Educational Technology & ICT

Objectives: Upon the completion of the course the student-teachers will able to:

Explain meaning, components, functions of computer and its historical backgrounds.

Understand the computer peripherals and its Organization in computer system.

- · Develop skill in handling computer and using word documents.
- Develop skill in computation, analysis and interpretation of data by using Excel Spread sheets.
- Understand the Educational implications of Power Point Presentation and its use in elassroom context.
- Understand the applications of Information Technology in the field of teacher education programme and training.

CC3: CREATING AND INCULSIVE SCHOOL

Objectives:

On completion of the Course the Student Teacher will be able to :

- 1. Identify the children of special needs.
- Underestand the nature of special needs their psychoeducational characteristics and functional limitation.
- Familiarize with assessment and placement procedure for children with special needs.
- 4. Develope understanding about accommodating special needs in regular classroom.
- Appreciate the education of children with special needs.

Course Content:

Unit 1- Special needs and education

- -Concept and types of special needs.
- -education of children with special needs and its implecation for universilisation of elementary education.
- -understanding and respecting diversity.
- -trends of education for children with special need in india.

Bachelor of Education Internship Guide

Description of Roles

Interns are students who is a graduate in their subject major, and are spending a four month working with experienced mentor teachers on their teaching practice while taking graduate courses in the Teacher Education department.

Mentor Teachers are experienced school teachers who mentor interns. They provide guidance, insight and opportunities for supported practice.

Supervisors work with school administrators/ Mentors to determine school experience for interns, mediate in difficult situations, and oversee interns' progress in schools and with respect to program requirements. They are faculty who organize campus based lectures and seminars in each subject area. They provide supervision and guidance for the interns in and out of the campus.

Intern Responsibilities

Interns are students of teaching. In contrast to traditional student teaching programs, interns are not expected to begin the year ready to teach on their own. Instead, they are expected to engage in observations, co-planning and co-teaching with their mentor teachers and to build their capacity toward assuming responsibility for extended lead teaching during the semester. Interns are in a period of transition from students to professional teachers. During this transition, they must retain the perspective of a learner as they take on the new and unfamiliar role of a teacher. Interns are expected to take an active role in their own learning and to contribute to the learning of fellow interns.

Planning and Communication

- · Keep supervisor informed about classroom schedules and events
- · Direct questions or concerns to supervisors or mentor
- Schedule observations and conferences with the mentor and inform supervisor of changes promptly
- Meet regularly with the mentor to discuss planning for instruction

Prepare written lesson and unit plans according to both mentor teacher and supervisor's expectations

This highlights the intern's field experience that contribute to the overall design of the internship year experience. In schools with other configurations of class time, interns and mentors should discuss with their field instructors how the intern's lead teaching time will be distributed throughout the year. Key aspects of any intern's lead teaching schedule include:

 After the initial week or two of school, the intern should have lead teaching responsibility (but not sole teaching responsibility) for at least one class period in a

- Interns are novice teachers for whom out-of-class preparation and reflection takes longer than it does for more experienced teachers. Having regular time during the school day to plan well for their teaching and reflect carefully on it is vital for the growth of the intern's practice and for the quality of the instruction they can provide to the students they share with their mentor. Interns may spend some of this time outside the classroom, and they may spend some of it in observation and analysis of the mentor's teaching.
- In the initial internship programme, short periods of increased lead(sole) teaching responsibilities should be preceded and followed by periods during which interns return to teaching only the focus class. From each period of increased lead teaching responsibility to the next, the demands on the intern's planning, teaching, and/or assessing should increase.
- Interns' on-campus classes do not meet every week of the internship. During certain
 weeks, the classes do not meet so that interns can be in their placement schools all
 five days of the week. Interns' obligations to their courses during this time focus more
 on at-school or in-class activities and less on lengthy reading or writing assignments.
