

ST. ALOYSIUS' COLLEGE(AUTONOMOUS) JABALPUR

PART A: Introduction

PROGRAM: Certificate		CLASS: BCA	SEMESTER: I	SESSION 2023-24
Subject: Computer Science				
1.	Course Code	S I - BCAA IT		
2.	Course Title	Computer Fundamental Organization and Architecture		
3.	Course Type	Major – Paper-I		
4.	Pre-Requisite (if any)	To study this course, a student must have basic knowledge of Computers.		
5.	Course Learning Outcomes(CO)	<p>On completion of this course, learners will be able to:</p> <p>CO1. Understand the basic structure, operation and characteristics of digital computer.</p> <p>CO2. Be able to design simple combinational digital circuits based on given parameters.</p> <p>CO3. Understand the working of arithmetic & logic unit</p> <p>CO4. Know about hierarchical memory system including cache memories and virtual memory.</p> <p>CO5. Understand concept and advantages of parallelism, multi-processors and multi-core processors.</p>		
6.	Credit Value	Theory 4 Credits Practical 2 Credits		
7.	Total Marks	Max. Marks : 100 Min. Passing Marks:35		

PART B: Content of the Course

No. of Lectures (in hours per week): 2 Hrs. per week

Total No. of Lectures: 60 Hrs.

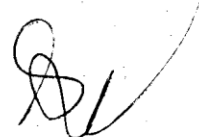

Module	Topics	No. of
I	Fundamentals of Computer – Definition, Characteristics, Block Diagram of a Computer, Input devices - Output Devices- Keyboard, Scanner, Mouse, light pen, Bar Code Reader, OMR, OCR. MICR, Printers- types of Printer, Monitors, Plotters-types of plotters, Computer Memory- Types of Memory.	10
II	Fundamentals of Digital Electronics: Number System-Binary, Decimal, Octal, Hexa-Decimal, Conversions, Binary Arithmetic- Addition, Subtraction, Multiplication, Division, Underflow, Overflow, Sign Magnitude, Complements-1's and 2's, Fixed-Point Representation, Floating-Point Representation.	10
III	Boolean Algebra, Reducing Boolean Expression, Logic Gates- AND, OR, NOT, Universal Gates-NAND, NOR. Analog and Digital Signals, Clock Waveform Timing, Map Simplification, K-Map- Two, Three and Four variables.	10

IV	Combinational Circuits- Adder, Subtractor, Multiplexer, Demultiplexer, Decoders, Encoders. Binary Codes – Gray Codes, ASCII code, BCD code, EBCDIC, Error Detection Code and Correction Code, Hamming Code.	10
V	Sequential Circuits - Flip - Flops, SR, D, T, JK, Master-Slave, Registers, Shift Registers- SISO, SIPO, PISO, PIPO, Counters, Instruction, Instruction Format, Instruction Codes, Handshaking, DMA Data Transfer, Auxiliary Memory, Cache Memory, Associative Memory, Flynn's classification - Introduction to SISD, SIMD, MISD, MIMD, Parallelism, Multicore processors.	10
Keywords/Tags: Digital Electronics, Logic Gates, Circuits, Instruction formats, Parallelism, Memory hierarchy, Multicore, Multi-threading, SISD, SIMD, MISD, MIMD.		

PART C: Content of the Course		
No. of Lab. Practical s (in hours per week): 2 Hrs. per week		
Total No. of Labs: 30 Hrs.		
	Suggestive list of Practical	No. of labs
	<p>PART-I (Computer Fundamentals)</p> <ol style="list-style-type: none"> 1. Various parts of a Computer 2. Identify various parts inside the CPU like motherboard, SMPS, Ports, Buses, IC chip, Processor, HDD, RAM. 3. Identify various I/O devices <p>PART-II (Digital Electronics)</p> <ol style="list-style-type: none"> 1. To study basic gates (AND, OR, NOT) and verify their truth tables. 2. To study and verify NAND as Universal gate using IC 7400. 3. To realize basic gate AND from Universal gate NAND. 4. To realize basic gate OR from Universal gate NAND. 5. To realize basic gate NOT from Universal gate NAND. 6. To study and verify NOR as Universal gate 7. To realize basic gate AND from Universal gate NOR. 8. To realize basic gate OR from Universal gate NOR. 9. To realize basic gate NOT from Universal gate NOR. 10. Verification and Interpretation of truth table for XOR gate. 11. To study Half Adder using basic gates and verify its truth table. 12. To study Full Adder using basic gates and verify its truth table. 13. To design and construct RS flip Flop using gates and verifies the truth table. 14. To design and construct JK Flip Flop using gates and verifies the truth table. 15. To verify De-Morgan's First Law Theorem. 16. To verify De-Morgan's Second Law Theorem. 	15

	Keywords/Tags: Digital Electronics, Logic Gates, AND, OR, NOT, IC7486, IC 7400, NAND, NOR, IC 7483, Circuits, Flip Flop, De-Morgan's Theorem.	
--	---	--

PART D: Assessment and Evaluation			
Internal Assessment : Continuous Comprehensive Evaluation (CCE) : 40 Marks		External Assessment: University Exam (UE) : 60 Marks Time : 02.00 Hours	
Internal Assessment	Marks	External Assessment	Marks
Lab Attendance	10 Marks	Practical record file	25 Marks
		Viva voce practical	10 Marks
Internal Viva	10 Marks	Execution	5 Marks
Practical File	20 Marks	Answer script	20 Marks
Total	40 Marks	Total	60 Marks

St. Aloysius College (Autonomous), Jabalpur, Madhya Pradesh

PART A			
Program: Certificate		Class: B.C.A.	Semester :1st SESSION 2023-24
1.	Course Code	BCA-102	
2.	Course Title	Programming and Problem Solving through 'C'	
3.	Course Type (Core Course/Elective/Generic Elective/ Vocational)	Minor	
4.	Pre-Requisite (if any)	10+2 Maths (opted as an elective by the students of Computer Application)	
5.	Course Learning Outcomes (CLO)	After the completion of this course, a student shall be able to do the following: CO1. Identify situations where computational methods and computers would be useful. CO2. Given a computational problem, identify and abstract the programming task involved. CO3. Approach the programming tasks using techniques learned and write pseudo code. CO4. Choose the right data representation formats based on the requirements of the problem. CO5. Use the comparisons and limitations of the various programming constructs and choose the right one for the task in hand. CO6. Write the program on a computer, edit, compile, debug, correct, recompile and run it. CO7. Identify tasks in which the numerical techniques learned are applicable and apply them to write programs, and hence use computers effectively to solve the task.	
6.	Credit Value	Theory - 4 Credits	
7.	Total Marks	Max. Marks : 40+60	Min. Passing Marks: 35
PART B: Content of the syllabus			
No. of Lectures (in hours per week): 4 Lectures per week			
Total No. of Lectures: 60			
Unit	Topics		No. of Lectures
I	Classification of programming language: Structured programming concepts, modular programming, top-down programming approach. Problem solving using computer: coding, compilation, debugging and testing, documentation, implementation and maintenance. Problem- Solving Techniques: Steps for Problem-Solving, Design of Algorithms, Definition, Features of Algorithm. Flowcharts, Basic		12

	Symbols used in Flowchart Design. Basics of C: History of C, salient Features of C, C language IDE'S: What is IDE's Types of IDE's, Structure of a C Program, a Simple C Program, Compiling a C Program, Link and Run the C Program.	
II	Variables and Constants: Character Set, Identifiers and Keywords, Rules for Forming Identifiers, Qualifiers, Variables , Declaring Variables, Initializing Variables, Constants , Types of Constants, Data Types , Operators , expressions, operator precedence and associativity. Managing input/output function: formatted and unformatted. Conditional Statements and Loops: Decision Control Statements: if Statements, switch Statement, Loop Control Statements: while Loop, do-while Statement, for Loop, Nested Loop, goto Statement, Break Statement, Continue Statement.	12
III	Array: one dimensional array Declaration, Initialization, insertion, deletion of an element from an array, finding the largest/smallest element in an array, two dimensional arrays, addition / multiplication of matrices. String: Declaration and Initialization of Strings, String formatted specifiers, Array of Strings, Use of <string.h>, String library function (strlen, strcpy, strcmp, strcat, strlwr, strrev), Storage Class: Need & types of Storage class.	12
IV	Functions: Definition of a Function, types of function, Declaration of a Function, Function Prototypes, passing arguments to a function, call by value, call by reference, command line argument, recursion. Pointers: pointers and their characteristics, address and indirection operators, pointer type declaration and assignment, pointer arithmetic, passing pointers to functions, array of pointers, introduction to pointer to pointer.	12
V	Structures: declaration of structure, accessing the members of a structure, initializing structures, structures as function arguments, structures and arrays, Preprocessor: What is pre-processor, Types of Pre-processor, Macros. File Inclusion, Conditional Compilation. Dynamic memory allocation Memory management, Types of memory allocation, Allocation (malloc, calloc, realloc), Deallocation(free) Command Line Arguments , Enumeration , typedef.	12

PART C: Learning Resources

Textbooks, Reference Books, Other Resources

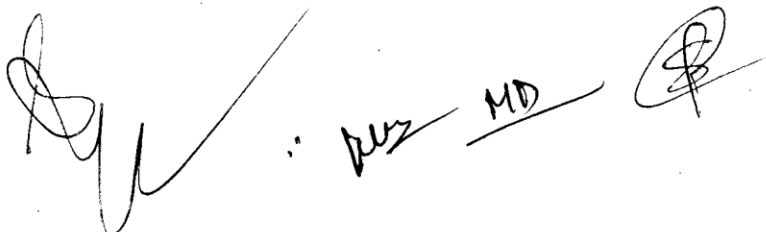

Suggested Readings

Textbooks:

- D. Ravichandran, programming New Age International, 1996.
- E. Balaguruswamy, Tata McGraw Hill Pub.

Reference Books:

- Y. Kanitkar, Let us C. BPB Publication, 4th Ed. 2002.
- Rajiv Dharaskar, Hidden Treasure of C, BPB Publication, 1995.

• Shridhar B. Dandin, Programming – Pragya Publication (Hindi Medium)

PART D: Assessment and Evaluation

Internal Assessment: Continuous Comprehensive Evaluation (CCE): **40 Marks**
 Shall be based on allotted assignments and Class Tests based on the Course outcomes.

Attainment Expressions	PO Mapping	PSO mapping	Cognitive level
Identifying basic problem of real world with abstract requirement (CO1, CO2)	PO1, PO2	PSO4	R, U
Applying algorithm, flowchart and pseudocode on basic real-world problems (CO3)	PO3	PSO5	AP
Applying input output operations and basic programming constructs on basic real problems (CO4, CO5)	PO1, PO2	PSO4, PSO6	AP
Writing basic programs for enhancing programming skills (CO6, CO7)	PO1, PO2, PO3	PSO9	AN, C

External Assessment: 60 Marks **Time: 03.00 Hours**

Section	Mark x No. of Questions
A: Very Short Questions	1 x 5
B: Short Questions	4 x 5
C: Long Questions	7 x 5

PART A:			
Program: Certificate		Class: BCA	Semester Ist
SESSION 2023-24			
Subject: Computer			
1.	Course Code		
2.	Course Title	C Programming Lab	
3.	Course Type (Core)	Lab	
4.	Pre-Requisite (if any)	10+2 Maths (opted as an elective by the students of Computer Application)	
5.	Course Learning Outcomes (CLO)	After the completion of this course, a student shall be able to: <ul style="list-style-type: none">• Basic Concepts of programming• Build Logic• Knowledge of problem solving skills	
	Credit Value	2 Credits	
	Total Marks	Max. Marks : 40+60	Min. Passing Marks: 35
PART B: Content of the Course			
No. of Lab. Practicals (in hours per week): 1 Lab. per week (1 hr 25 mins)			
Total No. of Lab.: 30 Hrs.			
SNo	Suggestive List of Practical		No. of Labs
1	Basic C commands on computer		30
2	Write a program to check given year is leap or not		
3	Write a program to find maximum from given three number without using		
4	Write a program to find area of a circle, rectangle, and square using switch-		
5	Write a program whether a given number is prime or not.		
6	Write a program to input 10 numbers add it and find its average.		
7	Write a program to generate even/odd series from 1 to 100.		
8	Write a program to create a pyramid structure		
9	Write a program to reverse a string.		
10	Write a program to find whether a given string is PALINDROME or not.		
11	Write a program to change the case of string.		
12	WAP to print Fibonacci series		
13	Write a program to generate a series $1+1/1!+2/2!+3/3!+-----+n/n!$		
14	Write a program to generate series $1+1/2!+1/3!+-----+1/n!$		
15	WAP to find length of string without using built in function.		
16	Write a program for call by value and call by reference.		
17	Write a recursive program to calculate factorial of a given number.		
18	Write a program to print sum of two matrices.		
19	Write a program to demonstrate different storage		
20	Write a program to demonstrate concept of command line argument.		
21	Write a program to demonstrate concept of structure.		
22	Write a program to draw Line, Circle, Rectangle by using built in function.		
23	Write a program to check given year is leap or not

The bottom of the page features several handwritten signatures and initials in black ink. From left to right, there is a signature that appears to be 'SR', followed by a signature that looks like 'S. S.', then 'W.S.', 'MD', and finally a signature that resembles 'E' or 'F'.

ST. ALOYSIUS' COLLEGE(AUTONOMOUS) JABALPUR

PART A: Introduction

Program: Certificate Class: B.C.A. Year: I Semester Session: 2022-23
Subject: Computer Application

1.	Course Code	S1-COSC1G
2.	Course Title	Data Analysis & Visualization through spreadsheet
3.	Course Type (Core Course/Elective/Generic Elective/ Vocational)	Elective
4.	Pre-Requisite (if any)	To study this course, a student must have prior basic Knowledge of using computer and internet,*This course is open for all.
5.	Course Learning Outcomes (CLO)	On completion of this course, learners will be able to: <ol style="list-style-type: none"> 1. Prepare a spreadsheet file and enter data into the sheet 2. Illustrate formatting and editing capabilities on the data 3. Demonstrate basic calculations and save data 4. Demonstrate basic visualizing, analyzing, organizing and sharing techniques
6.	Credit Value	Theory — 2 Credits
7.	Total Marks	Max. Marks; 40+60 Min. Passing Marks: 35

PART B: Content of the Course

No. of Lectures (in hours per week): **1 Lecture per week**

Total No. of Lectures: **30 Hrs.**

Module	Topic	No. of Lectures
i	Introduction to Spreadsheet: What is Spreadsheet, User interface, Basics of Spreadsheet: Overview of spreadsheet. opening new file and saving spreadsheet (through menu and keyboard shortcut). rows, columns, cells, workbooks and worksheets, merging cells; Selecting rows and columns. Non-contiguous cells: How to enter data (numeric. text. date). Working with multiple sheets, inserting and deleting sheets. Renaming sheets. Number formatting - Introduction. General and text. Number and fraction. Currency. Accounting. Percentage. Date. Time. Inserting and deleting rows, columns and cells. Formatting cells - Introduction. Bold. Italics and Underline. Border, Fill and Font. Alignment. Format painter and clear format. Editing the cell content. Entering multiple lines of text using ALT+Enter, auto fill, copy and paste, cut and paste, auto fill series, use of fill handle through mouse.	6
II	Printing worksheet: Select print area. see print preview, adjusting margin During print preview. Page Formatting: Page layout—Orientation. Size. Margins; watermark, page color, page borders; inserting headers and footer, inserting page numbers, date, path and filename. Viewing: split windows, layout view (normal. page break and Print). Protecting/Securing using file properties: Protect Workbook. Protect Sheet. Lock Cells. Read-only Workbook. Saving a File and use of Template.	6

	<p>Calculations: Entering formula, editing formula, copying formula. Cell references (absolute, relative and mixed), paste formula (using keyboard shortcut and fill handle).</p> <p>Data Validation: Reject Invalid Dates. Budget Limit; Prevent Duplicate Entries, Product Codes. Drop-down List, Dependent Drop-down Lists.</p>	
III	<p>Introduction to Functions: What is function, entering functions, types of Functions.</p> <p>Count and Sum: Countif, Count, Count Characters. Not Equal To, Sum, Total, Sumif, Sumproduct.</p> <p>Date & Time: DateDif, Today's Date. Date and Time Formats, Calculate Age. Time Difference. Weekdays, Days until Birthday, Last Day of the Month, Add or Subtract Time, Quarter. Day of the Year</p> <p>Text: Separate Strings. Count Words. Text to Columns, Find. Search. Change Case. Remove Spaces. Compare Text. Substitute vs Replace. Text. Concatenate. Substring.</p> <p>Statistical: Average, Negative Numbers to Zero. Random Numbers. Rank, Percentiles and Quartiles, Box and Whisker Plot. Averagelf, Forecast. Maxifs and Minifs, Weighted Average, mode, Standard Deviation, Frequency.</p>	6
IV	<p>Data Visualization: Introduction to charts. various type of charts (Column, Bar. Pie. Area, XY Scatter. Bubble. Net. Stock. Column & Line); 3-D Shape (Bar, Cylinder, Cone. Pyramid), Chart elements (Title. Subtitle. X-axis. Y-axis, Z-axis. Display grids, Legends, Display data series); Creating a Chart: Selecting data series, select chart components – labels, background, axis, format and design.</p> <p>Conditional Formatting: Manage Rules. Formula based. Data Bars. Colour Scales. Icon Sets, Find Duplicates. Shade Alternate Row s. Compare Two Lists. Conflicting Rules. Heat Map.</p> <p>Data Analysis: Sort and Filter</p> <p>Pivot Tables: Creating pivot table. Group pivot table items, pivot table summarization. Multi-level pivot table, Frequency distribution, pivot chart. Slicers, update pivot table, calculated field/item, GetPivotData, If analysis.</p>	6
<p>Keywords/Tags: Excel, Calc. Formatting. Protecting range, sheet, Functions. Sort, Filter. Freeze. Pivot. Analysis, Visualization. Charts.</p>

PART A: Introduction			
Program: Certificate		Class: B.C.A.	Year: I Semester
Subject: Computer Application			SESSION 2023-24
1.	Course Code	SI-COSC IR	
2.	Course Title	Data Analysis & Visualization Lab	
	Course Type (Core Course/Elective/Generic Elective/ Vocational)	Elective	
4.	Pre-Requisite (if any)	To study this course, a student must have prior basic knowledge of Using computer and internet. This course is open for all.	
5.	Course Learning Outcomes (CLO)	On completion of this course, learners will be able to: 1. Prepare a spreadsheet file and enter data into the sheet 2. Illustrate formatting and editing capabilities on the data 3. Demonstrate basic calculations and save data 4. Demonstrate basic visualizing, analyzing, organizing and sharing techniques	
6	Credit Value	Practical - 2 Credits	
7.	Total Marks	Max. Marks: 40+60	Min. Passing Marks: 35
PART B: Content of the Course			
No. of Lab. Practical's (in hours per week): 2 Hrs. per week			
Total No. of Lab. 16 hrs.			
	Suggestive List of Practicals		No. of Labs.
	<p>Note: In the first day of the lab instructor must make the students get familiar with the interface of the Calc/Excel along with the movement of cursor, rows, columns, cells, cell number identification, formula bar, use of fill handle (drag as well double click), setting width of columns and height of rows. Selecting rows and columns. Students must entry some data and practice above.</p> <p>1. Simple data entry in a workbook and Perform the following operations as given below.</p> <ul style="list-style-type: none">i. Inserting column and rows and deleting columns and rows.ii. Selecting range of columns and rows.iii. Change the width of column and height of rows by using menu.iv. Hiding and unhide the rows and columns.v. Entering multiple lines of text.vi. Rename the worksheet as "BCA 1st semester" and Save the workbook as "Practical 1". <p>2. Cell formatting , Auto Fill Series and Advance Fill</p> <ul style="list-style-type: none">i. Enter random data and perform a cell formatting operation.ii. Filling a series with formatting (rollno as 1 to 20).iii. Filling a series without formatting (rollno as 21 to 40).iv. Fill days.v. Filling a weekdays.vi. Perform an advance fill operation.		8

3. Create your mark sheet (as format given) and perform the following operations.

- Merge and center operation.
- Cell formatting
- Use Sum, percentage and nested if function for calculations.

4. Working with formulas.

- Find the number of students having percentage more than 60%. Max
- Find the number of students having percentage less than 45% Min
- Text
- Date and Time

5. Experiment related to the data validation (Use of drop-down list).

6. Experiment related to the data visualization.

Create worksheet related to crop production of various crops in Indian states in last five years (Wheat, Rice, Pulses, Soyabean, and Cane-sugar).

Crop production of various crops in Indian states in last five years (2018-2022)										
S.No.	Crops	Year	Production (in kg)							
1	Wheat	2018	5050							
2	Rice	2019	4567							
3	Pulses	2020	8976							
4	Soyabean	2021	2134							
5	Cane-sugar	2022	1456							

- 2-D chart (Make a bar and Pie graph)
- 3-D chart (Make a cone and pyramid graph)

7. Use of conditional formatting.

8. Data analysis using Sort and Filters.

Create a random 5 students mark sheet and perform the following operations.

- Find the name of the student got highest marks.
- Find the name of the student who got highest marks in both Theory and practical in subject.
- Sort the data on percentage and show only the top 3 highest rank students.

9. Data analysis using Pivot tables.

10. Data analysis and forecasting using what-if-analysis.

PART D: Assessment and Evaluation

Internal Assessment : Continuous Comprehensive Evaluation (CCE) : 40 Marks		External Assessment: University Exam (UE) : 60 Marks Time : 02.00 Hours	
Internal Assessment	Marks	External Assessment	Marks
Lab Attendance	10 Marks	Practical record file	25 Marks
		Viva voce practical	10 Marks
Internal Viva	10 Marks	Execution	5 Marks
Practical File	20 Marks	Answer script	20 Marks
Total	40 Marks	Total	60 Marks

PART D: Assessment and Evaluation

Internal Assessment: Continuous Comprehensive Evaluation (CCE): 40 Marks

Shall be based on allotted assignments and Class Tests based on the Course outcomes.

Attainment Expressions	PO Mapping	PSO Mapping	Cognitive level
Understanding mathematical concepts and deriving solutions (CO1, CO2, CO3, CO4)	PO1, PO2	PSO1	U, AN, AP
Identifying and analyzing real world problems and applying necessary mathematical concepts for providing a solution. (CO1, CO2, CO4)	PO3, PO4	PSO1, PSO2	AP, C

External Assessment: 60 Marks	Time: 03.00 Hours
Section	Marks x No. of Questions
A: Very Short Questions	1 x 5 = 05
B: Short Questions	4 x 5 = 20
C: Long Questions	7 x 5 = 35

ST. ALOYSIUS' COLLEGE(AUTONOMOUS) JABALPUR

PART A: Introduction

Program: Certificate		Class: B.C.A.	Year: I (sem 2)	SESSION 2023-24
Subject: Computer Applications				
1.	Course Code			
2.	Course Title	Programming using C++ and Data Structure		
3.	Course Type (Core Course/Elective/Generic Elective/ Vocational)	Major		
4.	Pre-Requisite (if any)	To study this course, a student must have basic knowledge of Computers.		
5.	Course Learning Outcomes(CLO)	After the completion of this course, a successful student will be able to do the following: 1. Develop simple algorithms and flow charts to solve a problem with programming using top down design principles. 2. Writing efficient and well-structured computer algorithms/programs. 3. Learn to formulate iterative solutions and array processing algorithms for problems. 4. Use recursive techniques, pointers and searching methods in programming. 5. Will be familiar with fundamental data structures, their implementation; become accustomed to the description of algorithms in both functional and procedural styles. 6. Have knowledge of complexity of basic operations like insert, delete, search on these data structures. 7. Possess ability to choose a data structure to suitably model any data used in computer applications. 8. Design programs using various data structures including hash tables, Binary and general search trees, heaps, graphs etc. 9. Assess efficiency tradeoffs among different data structure implementations. 10. Implement and know the applications of algorithms for searching and sorting.		
6.	Credit Value	Theory – 4 Credits Practical – 2 Credits		
7.	Total Marks	Max. Marks : 40+60		Min. Passing Marks: 35
PART B: Content of the Course				
No. of Lectures (in hours per week): 4 Hrs. per week				
Total No. of Lectures: 60.				
Module	Topics			No. of Lectures
I	Basics of OOPs: Features and Characteristics of OOPs, History of C++, Application of C++, Data Types, Operator in C++, C++ Stream Classes, Unformatted and Formatted I/O Operation, Managing Output with Manipulators, Scope Resolution Operator			12
II	Functions In C++: The Main Function, Function Prototyping, Call by Reference Call by Address, Call by Value, Return by Reference, Inline Function, Default Arguments, Constant Arguments, Function Overloading, Classes & Objects: A Sample C++ Program with class, Defining			12

	Member Functions (Private & Public), Static Data Members, Static Member, Functions, Array of Objects, Object as Function Arguments, Friend Functions.	
III	Arrays: Representation of single, two-dimensional arrays Constructor & Destructor: Constructor, Constructors with Default Arguments, Parameterized Constructor, Copy Constructor, Multiple Constructors in a Class, Destructor. Searching (linear & binary) and sorting (bubble sort, selection sort & insertion sorting)	12
IV	Inheritance: Defining Derived Classes, Single Inheritance, Making a Private Member Inheritable, Multilevel Inheritance, Hierarchical Inheritance, Multiple Inheritance, Hybrid Inheritance, Virtual Base Classes, Abstract Classes, Operator Overloading. Polymorphism: Virtual functions. Pointers, Exception Handling	12
V	Data Structure: Basic concepts, Linear and Non-Linear data structures Stacks: Operations, Array and Linked Implementations, Applications- Infix to Postfix Conversion, Infix to Prefix Conversion, Postfix Expression Evaluation. Queues: Definition, Operations, Array and Linked Implementations. Circular Queue-Insertion and Deletion Operations, Dequeue (Double Ended Queue), Priority Queue- Implementation. Linked Lists: Singly Linked Lists, Operations, Circularly linked lists- Operations Doubly Linked Lists- Operations, Doubly Circular Linked List.	12

Suggested equivalent online courses

S.No.	Online Course	Duration	Platform
1	Programming in C++ https://nptel.ac.in/courses/106/105/106105151/	8 weeks	NPTEL

[Handwritten signatures and initials: Jn, &u, MD, ...us, C, and others]

2	Beginning C++ Programming - From Beginner to Beyond https://www.udemy.com/course/beginning-c-plus-plus-programming/	Self paced	Udemy
PART D: Assessment and Evaluation			
Internal Assessment : Continuous Comprehensive Evaluation (CCE) : 40 Marks Three test will be taken of which best of two marks will be considered		External Assessment: University Exam (UE) : 60 Marks Time : 03.00 Hours	
Objective type Text I	20 Marks	Section (A) : Very short questions (1 from each unit)	1 x 5 = 5 Marks
Class Test II (Subjective)	20 Marks	Section (B) : 5 Short Questions (200 Words Each)	4 x 5 = 20 Marks
Class Test III (Subjective)	20 Marks	Section (C): 5 Long Questions (500 Words Each)	7 x 5 = 35 Marks
Total	40 Marks	Total	60 Marks
Any remarks/suggestions: Focus of the course/teaching should be on developing ability of the student in analyzing a problem, building the logic and efficient code for the problem.			

MD

PART A: Introduction			
Program: Certificate		Class: B.C.A.	Year: I (sem 2)
Subject: Computer Application			SESSION 2023-24
1.	Course Code		
2.	Course Title	Programming using C++ Lab	
3.	Course Type (Core Course/Elective/Generic Elective/ Vocational)	Core Course	
4.	Pre-Requisite (if any)	To study this course, a student must have basic logical and analytical skills.	
5.	Course Learning Outcomes(CLO)	After the completion of this course, a successful student will be able to do the following: <ol style="list-style-type: none"> 1. Develop simple algorithms and flow charts to solve a problem with programming using top down design principles. 2. Writing efficient and well-structured computer algorithms/programs. 3. Learn to formulate iterative solutions and array processing algorithms for problems. 4. Use recursive techniques, pointers and searching methods in programming. 5. Possess ability to choose a data structure to suitably model any data used in computer applications. 6. Implement and know the applications of algorithms for searching and sorting etc. 	
6.	Credit Value	Practical – 2 Credits	
7.	Total Marks	Max. Marks : 40+60	Min. Passing Marks: 35
PART B: Content of the Course			
No. of Lab Practicals (in hours per week): 2 hours per week			
Total No. of Lab.: 15 (30 hrs)			
	Suggestive list of Practicals		No. of Labs.
	Given the problem statement, students are required to formulate problem, develop flowchart/algorithm, write code in C++, execute and test it. Students should be given assignments on following : <ol style="list-style-type: none"> 1. Write a program to find area of a circle, rectangle, square using switch case. 2. Write a program to convert decimal (integer) number into equivalent binary number. 3. Write a program to check given string is palindrome or not. 4. Write a program to print digits of entered number in reverse order. 5. Write a program to print sum of two matrices. 6. Write a program whether a given number is prime or not. 7. Write a program to check entered number is Armstrong or not. 8. Write a program to find the area and volume of a rectangular box using constructor. 9. Write a program to implement single inheritance. 10. Write a program to find largest element from an array. 11. Write a program to implement push and pop operations on a stack using array. 		15

	12. Write a program to perform insert and delete operations on a queue using array. 13. Write a program for Linear search. 14. Write a program for Binary search. 15. Write a program for Bubble sort. 16. Write a program for Selection sort. 17. Write a program for Insertion sort. 18. Write a program to implement linked list.

PART A: Introduction			
Program: Certificate	Class: B.C.A	Semester: II	SESSION 2023-24
Subject- Computer Application			
1.	Course Code	SI-BCAB2T	
2.	Course Title	Operating System	
3.	Course Type (Core Course/Elective/Generic Elective/Vocational)	Minor	
4.	Pre-Requisite (if any)		
5.	Course Learning Outcomes	<p>After the completion of this course, a student shall be able to do the following:</p> <ol style="list-style-type: none"> 1. Describe the importance of computer system resources and the role of operating system in their management policies and algorithms. 2. Specify objective of modern operating system and describe how operating systems have evolved over time. 3. Understand various process management concept and can compare various scheduling techniques, synchronization, and deadlocks. 4. Describe the concepts of multithreading and memory management techniques. 5. Identify the best suited memory management techniques for any process. 6. Describe various file operations, file allocation methods and disk space management. 7. To understand and identify potential threats to operating systems and the security features design to guard against them. 8. Learn to operate the Linux system. 	
6.	Credit Value	Theory – 4 Credits	
7.	Total Marks	Max.MARKS:30+70	Min. Passing Marks:33
PART B: Content of the Course			
No. of Lectures (in hours per week): 2hr Lecture per week			
Total No. of Lectures: 60 Hrs			
Module	Topics	No. of Lectures	
I	Introduction to Operating System: What is Operating System? History and Evolution of OS, Basic OS functions, Resource Abstraction, Types of Operating Systems- Multiprogramming Systems, Time Sharing system, Distributed Operating System, Real time system, Operating System for Personal Computers, Workstation and Hand-held Devices,	10	

	Application of various Operating System in real life. Some prevalent operating system – Windows, UNIX/Linux, Android, MacOS, Blackberry OS, Symbian, Bada etc.	
II	<p>Process Management: Process Concepts, Process state & Process Control Block.</p> <p>Process Scheduling: Scheduling Criteria, Scheduling Algorithms (Preemptive & Non- Preemptive) – FCFS, SJF, SRTN, RR, Priority, Multiple-Processor, Real-Time, Multilevel Queue and Multilevel Feedback Queue Scheduling.</p> <p>Deadlock – Definition Characterization, Necessary and Sufficient Conditions for Deadlock.</p> <p>Deadlock Handling Approaches: Prevention, Avoidance, Detection and Recovery.</p>	
III	<p>Memory Management: Introduction, Address Binding, Logical versus Physical Address Space, Swapping, Contiguous & Non-Contiguous Allocation, Fragmentation (Internal & External), Compaction, Paging, Segmentation, Virtual Memory, Demand Paging, Performance of Demand Paging, Page Replacement Algorithms.</p> <p>File Management: Concept of File System (File Attributions, Operations, Types), Functions of File System, Types of File System, Access Methods (Sequential, Direct & other methods), Directory Structure (Single-Level, Two-Level, Tree-Structured, Acyclic-Graph, General Graph). Allocation Methods (Contiguous, Linked, Indexed)</p>	12
IV	<p>Disk Management: Structure, Disk Scheduling Algorithms (FCFS, SSTF, SCAN, C-SCAN, LOOK), Swap Space Management, Disk Reliability, Recovery.</p> <p>Security: Security Threats, Security policy mechanism, Protection, Trusted Systems, Authentication and Internal Access Authorization, Windows Security.</p>	12
V	<p>LINUX: Introduction, History and features of Linux, advantages, hardware requirements for installation, Linux architecture, file system of Linux – boot block, super block, inode table, data blocks.</p> <p>Linux standard directories, Linux kernel, Partitioning the hard drive for Linux, installing the Linux system, system – startup and shut-down process, init and run levels. Process, Swap, Partition, fdisk, checking disk free spaces. Difference between CLI OS & GUI OS, Window v/s Linux, Importance of Linux Kernel, Files and Directories, Concept of Open Source Software.</p>	12
