Lecture For Awareness Of Environmental Protection

Mr. Enosh Phillips sensitized the volunteers about environmental protection and prohibition of the use of single-use plastic and explained its importance. Single-use plastics are products made primarily from chemicals derived from fossil fuels (petrochemicals) and are intended to be disposed of immediately after use, within minutes. The ban on single-use plastic is very necessary due to its devastating impact on nature.

Governments of many countries, including India, have campaigned to stop the use of single-use plastic and use eco-friendly tote bags. Single-use plastics are generally non-biodegradable. Many marine animals like fish, turtles, etc. consume these plastics and they die due to its toxic effects. Therefore, these plastics are gradually being eliminated from every country. Therefore, awareness has to be made about the use of single-use plastic. 10 Student participated.
