Training workshop on "Poultry Farming as a Source of Self Employment

Two days training workshop on "Poultry Farming as a Source of Self-Employment" was organized on 30th & 31st August, 2019 in collaboration with Phoenix poultry farm, Gosalpur, Jabalpur. The workshop was conducted to promote the scientific knowledge, professional skill, entrepreneurship and marketing skills in poultry farming under the guidance of Mr Amar Shrivias, General Manager, Phoenix poultry farm, Gosalpur, Jabalpur. During the technical session on 30th August 2019, two guest lectures by veterinary doctors were organized to provide detailed technical knowledge of poultry farming. Faculty members and students visited the Phoenix poultry farm, Gosalpur, Jabalpur on 31st August 2019. Total 122 students of B.Sc III year and PG participated in the workshop.

1. Dr. Aamir Khan Veterinary Physician delivered a lecture on "Poultry Management"
2. Dr. A.K Upadhaya Veterinary Pathologist spoke on the topic "Common Poultry Diseases".

ON "Poultry farming as source of self-employment" (Entrepreneurship in Poultry Farming) 30th - 31st August 2019 "REGISTRATION FORM"	<ul style="list-style-type: none">To provide on campus trainings to the students.To promote the scientific knowledge, professional skill, entrepreneurship and marketing skills in Poultry farming.To acquire enterprise management capabilities including skills for project development and execution, marketing, etc related to Poultry farming.	
Name (in Block letters)	Technical Expert & Advisor	Prologue
.....	Mr. Amar Shrivias General Manager, Phoenix Poultry Farm, Jabalpur	<ul style="list-style-type: none">Poultry farming is the process of raising domesticated birds such as chickens, ducks, turkeys and geese for the purpose of farming meat or eggs for food. Poultry – mostly chickens – are farmed in great numbers.Poultry is at the same time particularly important for small holders and poor rural and urban population and a commodity produced in large scale and intensive operations, making it one of the fastest growing agricultural sub-sectorsGlobal production of eggs has reached 73 million tons and global production of poultry meat is close to 100 million tons (GLEAM 2, 2016). Backyard systems contribute to 8% of global eggs production and 2% of global poultry meat production. The majority (92%) of poultry meat production comes from specialized broiler systems and layers only contribute to 6% of the total.The world has over 23 billion poultry birds- about three per person on the planet (FAOSTAT, 2016), and about 5 times more than 50 years ago. They are kept and raised in a wide range of production systems, and provide mainly meat, eggs and manure for crop fertilization.
