DrillBit is a sophisticated plagiarism detection software developed by DrillBit SoftTech, designed to support academic integrity by identifying copied or plagiarized content. It is currently utilized by over 700 institutions both in India and internationally. DELNET (Developing Library Network), in collaboration with BIPL, has launched DrillBit as a service for its member institutions, providing them with an affordable option for maintaining academic standards through effective plagiarism detection.

The software offers a range of features to enhance the user experience and improve the efficiency of plagiarism detection. Users can log in to their accounts to create folders, upload files, and view reports. DrillBit allows for detailed analysis, including the ability to navigate through matched content, send plagiarism reports via email, and save files to an institution's repository for future comparison. Additionally, DrillBit includes settings to customize the plagiarism check according to specific needs, such as excluding references, quotes, small sources, or standard phrases from the search.
