Certificate / Vocational Program on Vermicomposting

Every year, the Department of Zoology organizes a certificate course on vermicomposting, which has been expanded into a vocational program under the National Education Policy (NEP) 2020. The course emphasizes environmental responsibility and promotes waste reduction, supporting the college's commitment to sustainability and equipping students with practical skills in waste management. Additionally, these educational programs are extended beyond the campus to teach villages about producing organic manure. Recently, the department has also begun offering consultancy for internship programs in vermicomposting to students from other Higher Education Institutions (HEIs), thereby spreading its expertise and sustainable practices to a broader student base.

Objectives:

Environmental Conservation: To enhance the local biodiversity and contribute to the greening of the community area.

Educational Impact: To educate students and community members about the importance of environmental sustainability.

Cultural Connection: To reinforce the cultural values associated with respecting the land and honoring national heroes through proactive community service.

Impact:

Biodiversity Enhancement: The introduction of a variety of plant species contributed to the area's biodiversity, supporting local fauna and creating a healthier ecosystem.

Community Awareness: Increased awareness about environmental issues among the community members, especially the younger generation.

Sustainable Development: Establishment of the Amrit Vatika as a model for future green space developments in the region.

Conclusion:

The tree plantation and Amrit Vatika creation event at the Anganwadi Center in Pipariya Kala was a resounding success, marking a significant step toward environmental stewardship and community engagement. Through this initiative, St. Aloysius College students demonstrated their commitment to the principles of "Meri Maati Mera Desh", fostering a deeper connection between cultural heritage and environmental conservation. This event has set a precedent for future activities aimed at building sustainable and resilient communities.
